

Account Code Detailed Billing

I now have a simple system to bill my calls back to my clients.

Having a system makes life easier. With *Account Code Detailed Billing*, your outgoing calls will be grouped under any category you choose. You can sort calls by client, project, cost centre, or business versus personal calls. Whatever arrangement you decide, *Account Code Detailed Billing* makes it easy to track billable calls.

I'm always looking for ways to make my business more efficient.

You can identify trends in your calling patterns with *Account Code Detailed Billing* because your monthly statement includes a list of all calls, and the cost, time and duration of each. You and your Bell Mobility representative can assess your calling patterns. Together, you can determine if your plan is the right one for you.

I want to oversee every aspect of my business.

Since *Account Code Detailed Billing* codes all calls according to your pre-assigned numbers, you can determine that calls without a number are non-billable. You will always be on top of things.

\$3

per month*

Account Code Detailed Billing from Bell Mobility is an easy way to bill outgoing client calls.

Here's how:

- Assign a code (1-999) to each client, project, cost centre or cellular user.
- When you make a call, enter the phone number followed by # and the code you assigned. Press **SEND**.
- Your monthly bill will display all coded and uncoded calls.

*Detailed Billing is a pre-requisite for this feature.
