### Adaptability is the key to survival

When it comes to those extra-tough jobs in construction, agriculture and industry, one name comes to mind. Bobcat. From our industry-leading range of skid-steers to our innovative all-wheel steer and compact tracked loaders, Bobcat products are famous for their performance, durability and reliability. And, of course, our capacity to adapt and continually meet demanding customer needs. Our new Selectable Joystick Control (SJC) option, for example, gives you the choice between 'ISO' and conventional 'H' hand controls, one of four different control options that match the loader to the user. Simple just doesn't get any easier. On top of that, the huge range of custom-designed Bobcat attachments provide that unique Bobcat advantage that makes us by far the most versatile choice in so many different applications.

## EXCAVATORS

### **Machines with an appetite for work**

With an all-steel body, superior breakout force and our famous reputation for durability, Bobcat compact excavators are built tougher to last longer. Our latest additions are perfect examples. They are the first mini-excavators to feature all-hydrostatic drive – the Bobcat FastTrack travel system. This allows full power to be available on each track at all travel speeds. So when the going gets tough, our machines keep going. But tough doesn't have to mean tiring. Therefore, no matter which of the 13 models you choose, you'll find a spacious cab, a comfortable seat and ergonomically designed, state-of-the-art joystick controls. All of which lets you work to the maximum without ever pushing yourself to the limit.

## TELEHANDLERS

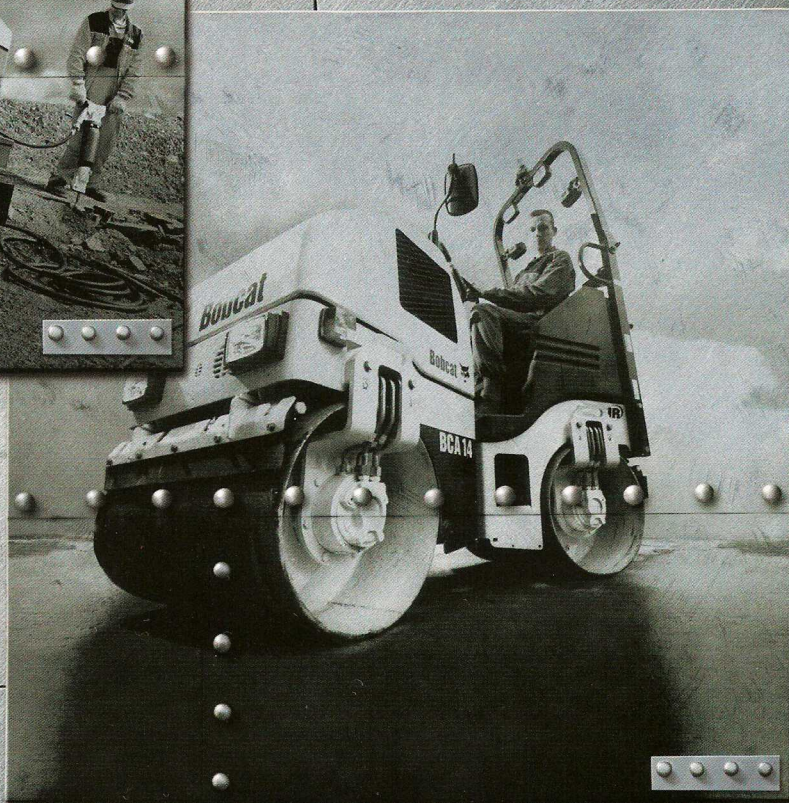

### **Performance reaches new heights**

At Bobcat, 'good' is never quite good enough. Something that becomes obvious when you see our growing family of telehandlers. There are now 9 models to choose from, offering hydrostatic drive, with lift capabilities from 2.5 to 4 tons and lift heights up to 17.5 metres. Continuous developments prove that we're never satisfied with the status quo. For instance, our latest models sport a new operator cab and a revolutionary new patent-protected boom which incorporates a built-in counter-bow to ensure straightness when extended under full load. But one thing remains constant. All our machines are designed around a full range of easy-fit, task-specific attachments and built for long-lasting durability. That's why you'll always be on top of the toughest jobs.

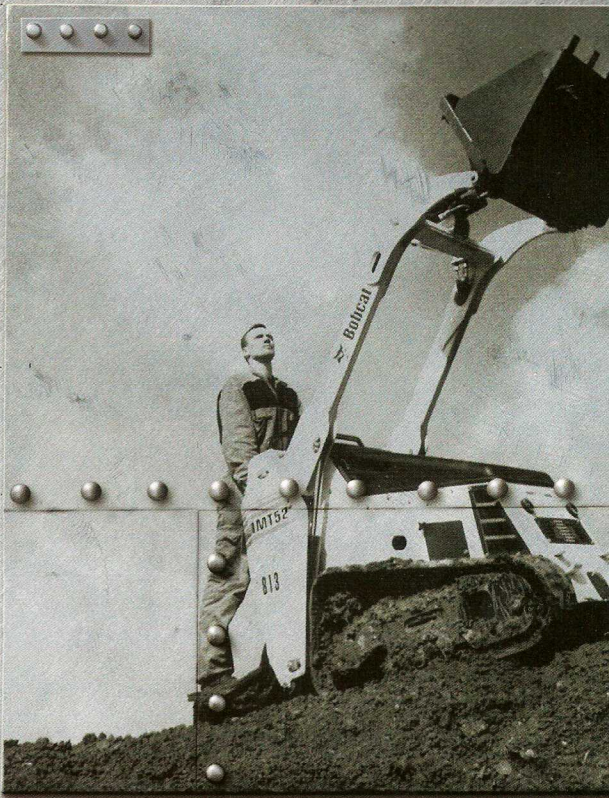

## COMPRESSORS

## COMPACTORS

### **Working smart is an instinct**

Bobcat appreciates that your working conditions are as important as the work itself. That's why countless hours are spent on real-world testing of our compressors to ensure that they do the job as efficiently and effectively as possible. Brains and brawn at their best. Inside the rugged steel body, great efforts have been made to minimise noise, reduce vibration and, ultimately, to perform tirelessly. The same holds true for our compactors. Designed to give you the productivity and compacted density needed to achieve the smoothest mat possible, they produce the necessary results the first time around. Because working smart is an instinct we all have.

## MINI TRACK LOADERS

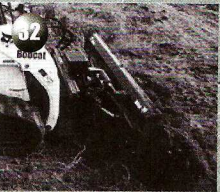

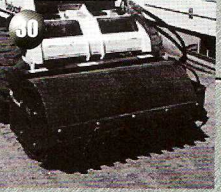

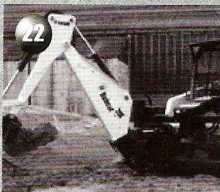

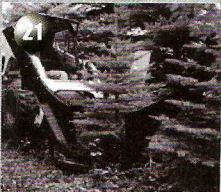

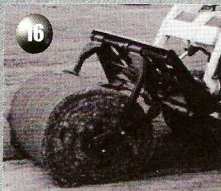

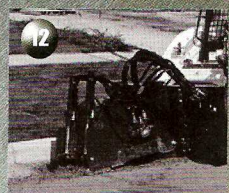

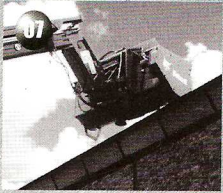

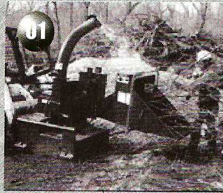

## UTILITY WORK MACHINE

### **One machine, many applications**

Tough products built with many applications in mind. Take the Toolcat, for instance. It's the first utility work machine to offer a true front loader lift arm for use with more than 20 attachments. In addition to this, full suspension, high road speed and a deluxe air-conditioned cab provide superior comfort for both driver and passenger. Our new mini track loader is also an exceptional performer in utility applications. You'll soon discover its power when using the all-new hydrostatic transmission, track drive system and operator controls. Throw in a new ride-on platform plus the widest range of attachments, and you have the most versatile tool carrier in the industry.

# ATTACHMENTS FOR EVERY APPLICATION

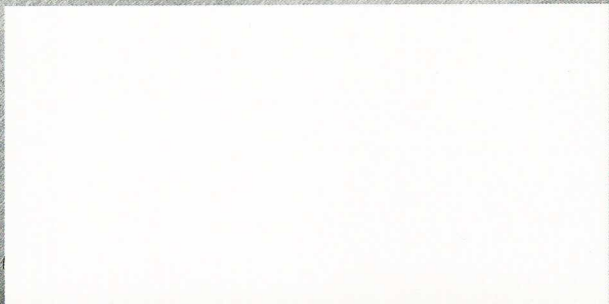

- 01 Chipper
- 02 Combination bucket
- 03 Concrete pump
- 04 Cuttercrusher
- 05 Digger
- 06 Dumper
- 07 Mixing bucket
- 08 Hydraulic breaker
- 09 Landplane
- 10 Landscape rake
- 11 Pallet forks
- 12 Planer
- 13 Scarifier
- 14 Scraper
- 15 Snow blower
- 16 Sod layer
- 17 Soil conditioner
- 18 Auger
- 19 Stump grinder
- 20 Sweeper
- 21 Tree transplanter
- 22 Backhoe
- 23 Angle broom
- 24 Trencher
- 25 Wheel Saw
- 26 V-blade
- 27 Brush cutter
- 28 Industrial grapple
- 29 Tilt-Tatch
- 30 Vibratory roller
- 31 Grader
- 32 Dozer blade

## Machines that know no bounds

Quick. Agile. Tough. If there's one name in compact equipment that means all these things, it has to be Bobcat®. All our machines are built to give years of reliable, cost-effective performance. From construction to agriculture and landscaping, our wide range of attachments allows you to cover a huge variety of tasks. No matter how demanding the job or how limited the space, there's a Bobcat machine to suit your needs and budget.
